John F. Spooner Farms Belle Glade,
Florida; Notice of Termination of
Investigation

Pursuant to Title V of the North American Free Trade Agreement Implementation Act (Pub. L. 103-182) concerning transitional adjustment assistance, hereinafter called (NAFTA-TAA), and in accordance with Section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974, as amended (19 USC 2273), an investigation was initiated on May 27, 1997 in response to a petition filed on behalf of workers at John F. Spooner Farms, located in Belle Glade, Florida (NAFTA-01747).

The Florida Department of Labor and Employment Security has been unable to locate the company official at the subject firm. Consequently, the Department of Labor cannot conduct an investigation to render a determination as to whether the workers are eligible for adjustment assistance benefits under the Trade Act of 1974.

Therefore, further investigation in this matter would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC, this 19th day of October 1997.

Grant D. Beale,*Acting Director, Office of Trade Adjustment Assistance.*

[NAFTA-01092]

Lucent Technologies, Incorporated,
Berg Electronics, Inc., Lee's Summit,
Missouri; Amended Certification
Regarding Eligibility To Apply for
NAFTA-Transitional Adjustment
Assistance

In accordance with Section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974, as amended (19 U.S.C. 2273), the Department of Labor issued a Certification of Eligibility to Apply for NAFTA Transitional Adjustment Assistance on August 9, 1996, applicable to all workers of Lucent Technologies, Incorporated located in Lee's Summit, Missouri. The notice was published in the **Federal Register** on March 12, 1996 (61 FR 11474).

At the request of petitioners, the Department reviewed the certification for workers of the subject firm. The petitioners, are employees of Berg Electronics, Inc., producing paddle board connectors and cable assemblies at Lee's Summit. The workers at the subject plant are not separately identifiable by product line. Review of the certification shows that the name of the parent company, Berg Electronics, Inc., was inadvertently excluded from the certification. Based on this information, the Department is amending the worker certification to include workers of Berg Electronics, Inc., Lee's Summit, Missouri.

The intent of the Department's certification is to include all workers of the subject firm who were adversely affected by the shift in production to Mexico.

The amended notice applicable to NAFTA-01092 is hereby issued as follows:

All workers of Lucent Technologies, Incorporated and Berg Electronics, Inc., Lee's Summit, Missouri, who became totally or partially separated from employment on or

after June 19, 1995 through August 9, 1998, are eligible to apply for NAFTA-TAA under Section 250 of the Trade Act of 1974.

Signed in Washington, DC, this 8th day of October 1997.

Grant D. Beale,*Acting Director, Office of Trade Adjustment Assistance.*

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petitions for Modification

The following parties have filed petitions to modify the application of mandatory safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. McElroy Coal Company

[Docket No. M-97-112-C]

McElroy Coal Company, Consol Plaza, 1800 Washington Road, Pittsburgh, Pennsylvania 15241-1421 has filed a petition to modify the application of 30 CFR 75.312(d) (main mine fan examinations and records) to its McElroy Mine (I.D. No. 46-01437) located in Marshall County, West Virginia. The petitioner requests a variance to permit the testing of the function of an automatic closing door without stopping the fan. The petitioner proposes to test the operation of the fan closing door at least every 31 days, by rotating the test frame outward from its normal resting position until it contacts the flow reversal prevention door, by rotating the test frame in order to test the function of the bearings supporting the flow reversal prevention door, and to have the persons conducting the test visually observe the movement of the test frame and the contact between the test frame and the flow reversal prevention door, and to visually observe the general maintenance of the approved design. The petitioner asserts that the proposed alternative method would provide at least the same
